

BUS HANDLES

At present moment the firm RAWAG produces a few dozen types of entrance handles. The handles are manufactured of two types overall aluminium profiles (outsiding): 15 mm x 32 mm and 21 mm x 32 mm. The handles are made like a straight, flexible and flexible with welding side element. The bend radius is according with customer's wishes. The tips of handels are pressig and trimmed.

The radius on the tips of handles after trimming is R – 10. In serial production are three basic height (the dimension from the bus body to interior edge of the handle):

- 26,5 mm
- 35,5 mm
- 36 mm

In the handles are manufactured the assembly hohes Ø 9 and technological holes (drainig) Ø 4.

The firm can manufacture the handes in unseasoned state (prepared for paintig) or they can be painted in any RAL colour.

The handles are applied in:
MERCEDES, MAN, SCANIA, SOLARIS, SOLBUS
and in modernised cars (individual customers).
